SUCCESS STORY

World's Youngest CEO Suhas Gopinath: The Rise of Globals Inc at 14

Bangalore boy **Suhas Gopinath** launched Globals Inc at 14. He set up Globals Inc, a web solutions and networking company, with a team of four. Now, he has 350 employees, offices in 11 countries; He is recognized as **"the world's youngest CEO"**

It was Catch-22 with a heartbreaking twist. Even before the first faint stubble had darkened his chin, Suhas Gopinath bagged a major outsourcing project that many others would have given their right hand for. But only to be told that the law said he was too young to sign on the dotted line.

That's the story of this 17-year-old Bangalore boy wanting to be another Bill Gates. He had launched his own firm at the ripe old age of 14 years. Today, his firm, Globals Inc, is 60-member strong with representatives in the US, the UK, Canada and India—all of them aged 17 to 22 years. None of the members have had any formal computer education. Incidentally, Globals' young CEO had originally wanted to be a veterinarian, until he was in Class IX and the cyber bug bit him.

"I had no knowledge of the Internet. But when I was browsing the Internet in a cyber cafe I stumbled on a source code of a web site. I was fascinated and thought long and hard. I soon launched my own website, www.coolhindustan.com," says Gopinath, fingering his navy blue blazer and battling a pronounced stammer, at the Bangalore IT.COM 2003 venue. That had happened when he had still not crossed 14 years.

A week later, recognition came when Network

Solutions Inc, owned by Nasdaq-listed New York-based Verisign Inc gave him the certificate of a professional web developer. He was invited to Network Solutions headquarters and even asked to maintain their web site. Now hold your breath: "I declined because I was not interested in serving a US company."

Gopinath says it was the attachment to his family and the ambition to start his own organisation that brought him back to India.

Globals Inc took shape initially with only four members, and Network Solutions helped him to incorporate the company in the US. "I was told that in India, you need to pay sales tax and also have an infrastructure before you can register a firm. But all our members work from home or from a cyber cafe," he says.

Gopinath's company is into web-based and software solutions, mobile and e-commerce solutions—besides making web sites for corporates, advertisers and educational institutions. But Gopinath doesn't get carried away with the pricing part. "We even have a client in Frankfurt for whom we made a corporate website. We have been able to generate a turnover of \$1 million this year," he says.

Mr. Suhas Gopinath was declared one of the **"Young Global Leaders"** for 2008-2009 by the prestigious World Economic Forum; he became the youngest member ever in the **World Economic Forum's** history.
